

This web site will be your portfolio for assignments. You need to be able to easily update the site so we will use GitHub to host our webpages. However we'd like you to personalize your domain name.

- 1) Develop a demo page on GitHub and clone it to your machine.
 - https://youtu.be/P_JDIzFWkM
- 2) Buy a website on Namecheap.com (you can get one for less than \$1). Update it on Namecheap to be served from GitHub. Update it also on GitHub.
 - <https://youtu.be/HsvrZv-3-H0>

We will put a link to a Google Doc where you can enter your site details.

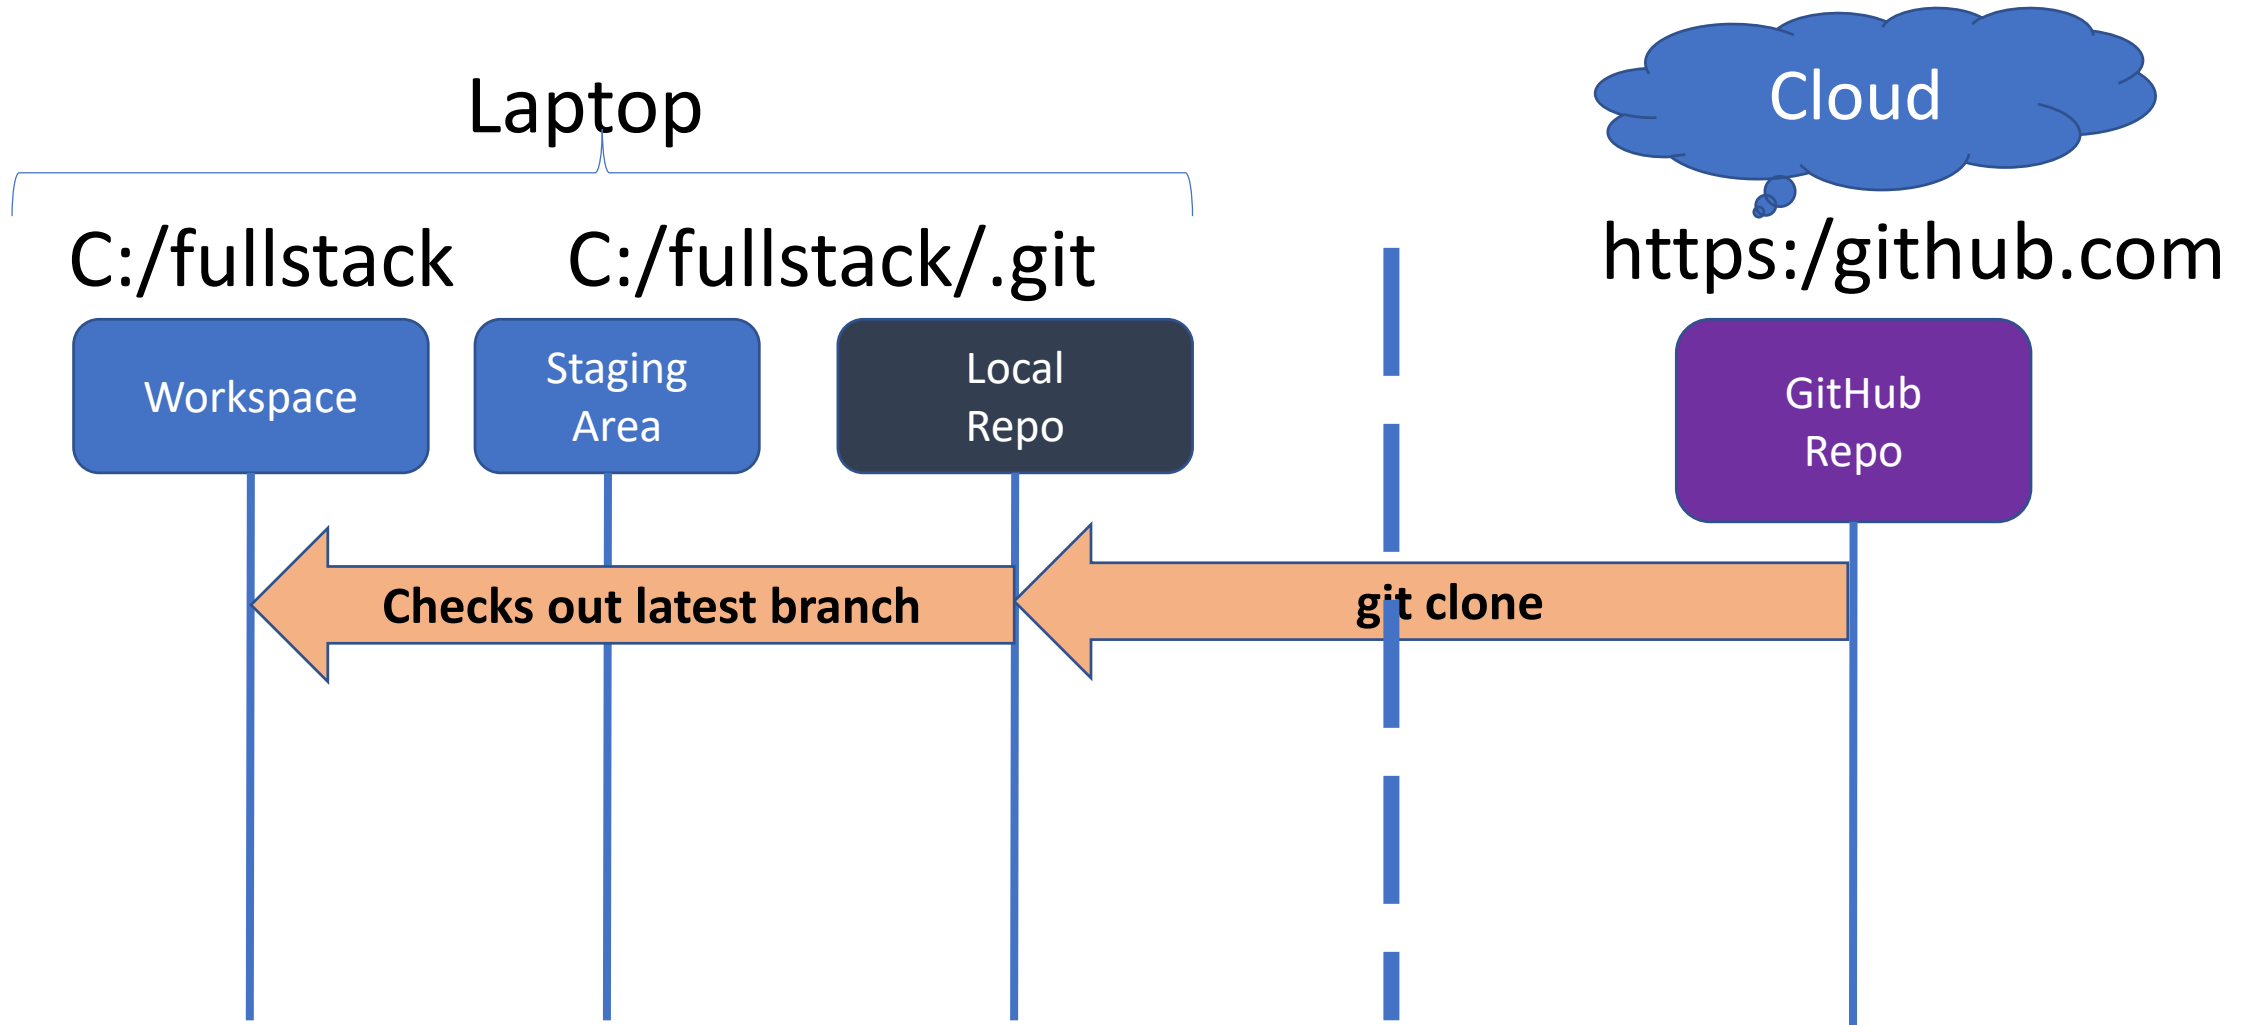

```
ssh-keygen -t rsa -b 4096 -C "emailaddress@gmail.com"
```

DO NOT GIVE IT A PASSPHRASE

```
eval $(ssh-agent -s) Agent pid 59566
```

```
ssh-add ~/.ssh/yourchoice
```
